PROFESSIONAL SUMMARY

Results-driven and innovative Full Stack AI Developer and Web Developer with a B.Tech in Computer Science Engineering, specialising in AI-powered web application development, Generative AI solutions, and modern responsive websites. Skilled in modern web technologies, AI integration, AI-assisted development workflows, responsive UI design, and full-stack application development. Experienced in building intelligent, user-focused digital products with a strong emphasis on performance, scalability, and seamless user experience. Passionate about leveraging AI and modern software engineering practices to create impactful products and innovative software solutions.

TECHNICAL SKILLS

Programming Languages: TypeScript, JavaScript, Python

Frontend: React, Next.js, Tailwind CSS, HTML, CSS

Backend: FastAPI, Node.js

AI/ML: Google Gemini AI, Generative AI, Prompt Engineering, Embeddings, RAG (Retrieval-Augmented Generation), Vector Databases (Qdrant)

Tools & Platforms: Git, GitHub, Docker, Monaco Editor, Sandpack, Vercel, LangChain, LangGraph, Cursor, PostgreSQL, Redis

Concepts: Generative API Development, UI/UX Design, Responsive Design, Component-Based Architecture, State Management, System Design, Microservices, REST API Design

PROJECTS

Personal Portfolio Website

rahullrajeev.vercel.app

Tech Stack: Next.js, React, TypeScript, Tailwind CSS, Framer Motion, Vercel

- Designed and built a premium multi-page portfolio (Home, About, Projects, SEO, Resume, Contact) showcasing full-stack AI development and technical SEO expertise.
- Implemented cinematic scroll-triggered animations, page transitions, and micro-interactions using **Framer Motion**.
- Built a responsive, **editorial-style UI** with a featured project case-study section and core-expertise showcase.
- Optimised for SEO metadata, performance, and responsive rendering across devices; deployed on Vercel.

ModuSpark AI Component Studio

moduspark-ai-component-studio.vercel.app

Tech Stack: Next.js, React, TypeScript, Tailwind CSS, Google Gemini API, Monaco Editor, Sandpack, Vercel

- Developed an AI-powered platform that **converts natural language prompts into production-ready React and Tailwind CSS components using Google Gemini AI**.
- Integrated Google Gemini AI for advanced generative capabilities, transforming text descriptions into functional code.
- Implemented a **live code preview feature using Sandpack**, enabling **real-time visualisation** of generated components.
- Incorporated **Monaco Editor** for an editable code sandbox, allowing users to modify and refine generated code directly within the application.
- Designed and built a responsive, modern user interface with a focus on SaaS-style aesthetics and dark-mode compatibility.
- Engineered a **robust API** (/api/generate) to handle AI requests and manage component generation logic.

Tech Stack: *Python, FastAPI, Gemini API, PostgreSQL, Redis, Qdrant*

- Developing a comprehensive AI system for semantic retrieval, repository indexing, and context engineering within codebases.
- **Building an AI that behaves like a senior developer** with full repository understanding, going beyond code generation.
- Applying AI engineering concepts including embeddings, **vector databases (Qdrant)**, semantic search, **RAG**, chunking strategies, context orchestration, and prompt engineering.
- Implementing backend engineering with async pipelines, file ingestion, and parsing systems.
- Designing the system to let developers **upload repositories, ask architecture questions**, generate repo-aware components, trace code flow, detect issues, and generate documentation.

EDUCATION

Bachelor of Technology (B.Tech), Computer Science Engineering

SNGIST Group of Institutions, Ernakulam
